## WARNING FALL HAZARD

### **Read all instructions before assembling and using this Baby Carrier.**

Important: Keep instructions for future use.

Small babies can fall through a leg opening. Follow instructions for use.

Only use this Baby Carrier for babies from 21" (53 cm) and 8 lb (3.5 kg) up to 22 lb (10 kg).

Baby must face towards you until he or she can hold head upright.

This Baby Carrier is designed for use by adults while walking only.

Adjust leg openings to smallest possible size.

For babies 8-11 lb (3.5-5 kg) the infant leg button must be used.

Hold baby close to you until securely fastened in the carrier.

Make sure baby is properly positioned with the legs straddling the seat and both arms extending through the armholes.

Check to ensure all buckles, snaps, straps and adjustments are secure before each use.

Pull all straps tightly around your body.

Suffocation risk if baby is positioned incorrectly or if Carrier does not fit properly.

Never lie down with baby in Baby Carrier.

Inspect the Baby Carrier regularly for any signs of wear and tear before each use.

Do not unfasten the torso belt while baby is in the Carrier.

Do not exercise while wearing the Carrier.

Use care around hot, sharp, or hazardous objects. Baby can grab objects.

## Helpful Hints

Position the back adjustor before placing your baby in the carrier. The back adjustor should be positioned comfortably between your shoulder blades.

Always make sure that the torso belt is securely attached before placing your baby in the carrier.

Be sure to continually support your baby until you've confirmed that all clips are securely latched.

For the baby's comfort, ensure that the interior padding piece at the lower clip connection is positioned to cover the buckle that rests near or against baby's body.

For greatest comfort, the carrier should ride fairly high and fit snugly against your body. For a general reference point, your baby's head should sit directly below your chin and the torso belt should fit snugly against your rib cage.

For quickest use, leave the left lower clip attached, and keep top adjustment straps fully extended.

To maintain the shape of your carrier, lay flat for storage or hang uniformly on a hanger by both straps.

# CARRIER PARTS

Refer to these parts when reading the instructions.

## FOR USE WITH AN INFANT

with baby facing in, toward your body

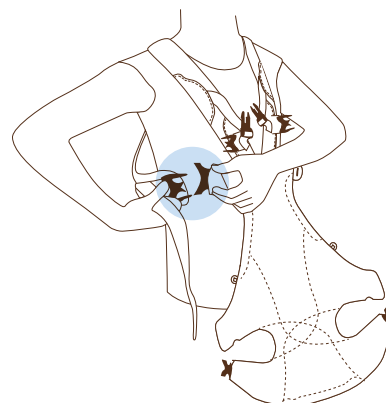

Use the following directions to carry a baby from 21" (53 cm)  
and 8 lb (3.5 kg) up to 22 lb (10 kg)

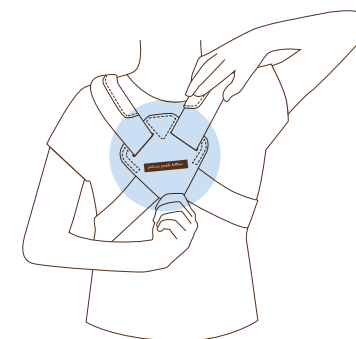

**STEP 1** Hold the carrier by the top straps with the "PETUNIA PICKLE BOTTOM" logo on the back adjuster facing you. All clips, including the right-side torso clip, should be unlatched. Top adjustment straps should be fully extended.

**STEP 2** Slip the carrier over your head, feeding your head through the center opening and your left arm through the left strap opening (as if you were putting on a t-shirt). Shoulder straps should lie flat and untwisted on each shoulder.

**STEP 3** Reach around and grab the loose right-side torso strap and connect it to the torso clip connection on carrier shell. Tighten the two torso straps so that harness fits snug.

**STEP 4** Slide the back adjuster plate so that it is positioned comfortably between your shoulder blades.

**STEP 5** Fold the carrier up towards your body. On the left side, connect the lower clip on the shoulder strap to the lower clip connection on the carrier shell.

**STEP 6** Connect the upper clip on the left shoulder strap to the upper clip connection on the left side of the carrier shell with the head support in the up position. Top adjustment straps should be fully extended.

**STEP 7** Gently place your baby in the carrier facing you by feeding the baby's right leg and right arm through the corresponding openings. Ensure that the baby is centered in the carrier. Continue to hold the baby until all carrier clips have been securely closed. The clips should make an audible click when they are fully latched.

**STEP 8** While fully supporting your baby, connect the lower clip on the right shoulder strap to the lower clip connection on the right side of the carrier shell.

## FOR USE WITH AN INFANT (CONT.)

Use the following directions to carry a baby from 21" (53 cm) and 8 lb (3.5 kg) up to 22 lb (10 kg)

**STEP 9** Connect the upper clip on the right shoulder strap to the upper clip connection on the right side of the carrier shell.

**STEP 10** Pull the top adjustment straps on the upper left and right clips to provide gentle support for the baby's head. Always make sure there is adequate room around your baby's face to provide a clear source of air.

**STEP 11** For babies between 8-11 lbs (3.5-5 kg), connect the infant leg support button on the left and right side of the shell to the infant leg button hole on the lining.

**STEP 12** While supporting the baby with one hand, adjust the carrier to your body by tightening the left and right torso straps, and if needed, re-positioning the location of the back adjuster. When worn properly, torso and shoulder straps should fit snugly to the body. For proper back support, the carrier should never be worn with the straps loose.

## FOR USE WITH AN OLDER BABY

When your baby is old enough to hold his or her head and shoulders upright, you may use the carrier with your baby facing out.

To position your baby facing out, follow steps 1-5 then proceed to steps 6-9 below.

**STEP 6** Gently place your baby in the carrier facing out by feeding the baby's left leg through the left leg opening.

**STEP 7** While fully supporting your baby, connect the lower clip on the right shoulder strap to the lower clip connection on the right side of the carrier shell.

**STEP 8** Still supporting your baby, fold down the head support at the top of the detailed stitch lines and connect the upper clips in the modified, folded-over position. The baby's arms should be above the folded-down front flap. Tighten or loosen the upper clip adjustment straps to your baby's comfort.

**STEP 9** While supporting the baby with one hand, adjust the carrier to your body by tightening the left and right torso straps, and if needed, re-positioning the location of the back adjuster. When worn properly, torso and shoulder straps should fit snugly to the body. For proper back support, the carrier should never be worn with the straps loose.

## REMOVING YOUR BABY FROM THE CARRIER

**STEP 1** If in use, unhook the infant leg buttons on the left and right side of the leg openings.

**STEP 2** Unclasp the upper clip and the lower clip on the right side only, making sure to fully support your baby with your left hand.

**STEP 3** Gently remove your baby from the carrier with your right hand.

## Washing Instructions for the Sightseer Carrier:

Machine wash cold, gentle cycle.  
Remove promptly. Do not twist or wring.

Lay flat to dry. Do NOT machine dry.

To remove excess moisture and reduce drying time, open and lay carrier flat with the shell of the carrier between two dry towels. Gently roll the carrier shell and towels together to absorb moisture. Do not leave rolled in towels. Unroll and remove towels before laying flat to dry.
